

ΦΑΡΜΑΚΑ Ν.3816/2010

Pharmaceutical Products under Law 3816

Prices of products classified under law 3816/2010 as high priced products for treating severe diseases have been moderated due to the decrease of pharmacy and wholesaler margins of profit, established by Ministerial Decision (Market Decree) 10-06-2011/ΦΕΚ Β 1231 - 14.06.2011.

For products classified under law 3816/2010, the hospital price also applies exceptionally to wholesalers. This special provision applies only to the enlisted products in order to facilitate access of patients through retail and hospital pharmacies while avoiding extra cost to social security funds, which fully reimburse these products.

Consequently, it is recommended that hospital prices for the products classified under law 3816 are not taken into consideration as prices to wholesalers.
